

INGLISWEDEN GIVE A PEN - GET VALVE

Get maximum marketing value of your promotional pen

Ingli Sweden has developed a concept that we call PenValue and the purpose is to raise awareness of the value of the promotional pen. It is also a measure of how well suited a promotional pen is to its message, purpose, target group, and area of use relative to its price and the sender's graphic identity. Even a cheap pen can have a high PenValue if it is purchased for the right purpose and use.

In our PenValue-guide we explain the concept and how to choose a pen with maximum PenValue. The guide will help you understand how promotional pens can become an effective and vital marketing channel for you. It discusses both how to build a brand and generate new business. How can you get maximum value out of your pen?

Consider the following factors when choosing promotional pens for your business:

- Graphic identity: Does it reflect your brand?
- Message: What do you really want to say?
- Recipients: What do they want/need?
- Purpose: What do you want to achieve?
- Function: Usability is appreciated!
- Quality and Enviroment: Think sustainable!
- Industry: Adapt for the right business area!
- Quantity: One pen for each meeting?
- Colour and Design: Convey the right feeling!
- Time: Get the most profitable deal!

Take the opportunity to learn more, be inspired and develop your marketing by downloading the PenValue Guide at: Inglisweden.com

How to find the right pen for your purposes

Ingli Sweden celebrates 40 years in helping companies strengthen their brands by using printed pens. On our website, www.inglisweden.com, you can get help to find the right pen for your purposes and requirements. There we offer over 1000 pens in different price ranges, colours and designs with various functions.

Here are 3 ways to search for pens on our website:

1. The Search function

In the top menu you will find the Search function where you can search for pens, related information or any other type of content. The result is easily structured to help you quickly find what you're looking for.

2. The Quick access

Further down the website is the Quick access provided with the most common search options, such as type of pen, price range and colour. From here you get directed to a list of relevant pens in our Pen Selector.

3. The PenSelector

In the Pen Selector you can search among all our pens. Here you have the opportunity to refine your search and make settings based on your own criteria. Besides colour and price range, you can choose to view only eco friendly pens or pens with a certain type of ink. It is also possible to search pens by brand.

The main thing to remember is that a promotional pen should reflect your brand in both design and function and that the highest "PenValue" will be achieved only when you have a well planned purpose of use.

Always feel free to contact us for help!

If you are having trouble choosing or cannot find what you are looking for please feel free to contact us. We will be glad to inspire and help you find the right pen for your purposes and requirements. We will be glad to guide you, whether you need inspiration, advice or want help finding the right promotions for your company.

UP-TO-DATE INFORMATION: FAST AND SIMPLE!

We are committed to always give you as up-to-date information as possible which is why we have provided all products in this year's catalogue with QR codes that will lead you straight to the product on our website. Basic product information and price examples are of course still available in the catalogue for you to quickly form an idea of the product.

Most mobile phones today have built-in functionality for reading QR codes directly in the camera app. All you have to do is point the camera at the code and a link will appear on the screen. However, on older mobiles and some android phones, you may need to download a special app to do this.

INGLI

INGLI

SWEDISH DESIGN

INGLI is our own Swedish brand for a series of promotional pens that stand for innovation, quality and writing performance. Many pen models have also been designed with inspiration from mathematics and technology. Some examples of this are Quattro with its four different functions, Phi drawn in proportion to the golden ratio and our latest release Excel which was inspired by the calculation program with the same name.

STYLISH AND EFFECTIVE MESSENGERS

The INGLI pens are specifically designed to be stylish, affordable and effective messengers. The range includes models in varying styles in order to accommodate different situations. The pens also have different functions and characteristics, each of which adds something extra to your advertising message. All models provide generous printing areas and are delivered with our own refill of the highest quality. The brand INGLI has exsisted since 1980 so it is both with passion and experience we design our pens.

Writing Instruments since 1980

ADD1 COMFORTABLE GRIP AND LARGE, PRINTABLE CLIP

NEW IDEAS OFTEN BEGINS WITH A PEN!

An invention or product often begins with a pen used to sketch an idea. Everything from houses and floor plans to technical gadgets and fashion has for a long time started with a drawing on paper. The computer in all its glory, but brainstorming, mindmaps, idea sketches and notes will always be the best when created by hand. So do not forget the pen's potential for these purposes. And of course, do not forget to brand your pens with your logo.

EXCEL 10100-0067

This promotional pen from INGLI, has an innovative industrial design. The rubberized, ribbed pen body make the pen fit firmly in the hand. The solid clip emphasizes your brand in an attractive way.

PHI CHROME GEL 10100-1030

A more luxurious pen with gel refill for a more comfortable writing. Phi Chrome Gel has a twist mechanism and is designed according to the Golden Ratio. The pen with the liquid gel ink is perfect for those looking for an exceptional writing experience.

PENS TO ENHANCE AN **EXPERIENCE!**

In our age experience is paramount! Any company can offer an experience by making its service, product and interaction with other people more positive and more memorable. Of course, There are many ways this can be done, one of the most effective being product media, such as promotional pens. To get that positive effect you're looking for it is, however, important to think about the quality and functionality of the pen, as well as the sensory impression it leaves on its user, the way it looks, how it feels to hold and even how it smells.

penvalue

.....

QUATTRO INNOVATIVE PEN WITH 4 SMART FUNCTIONS

An innovative promotional pen with no less than 4 different smart functions. Besides the traditional ballpoint it provides 3 functions especially designed for smartphone users. As a promotional pen Quattro also provides a very generous printing area which makes it the perfect advertising item for all modern companies.

All price examples above refer to approximate prices at the specified quantity, printing included. VAT and Freight costs excluded. For multicolour printing, add \in 0,20/colour. Set up cost is \in 57 for each print/colour. Set up cost for digital print is \in 95.

Stilolinea was founded in the early 1970s and, since its origin, has focused on maintaining its "Made in Italy" guarantee. The production is carried out at San Mauro Torinese, in a modern plant which extends over 9000m2. There, all stages of the production are performed, from the mould construction, the moulding of plastic materials to the assembly of the pens, through the use of fully automated machinery before the products final inspection.

stilolinea PROMOTIONAL AND GIFT BALLPOINT PENS SINCE 1972

All processes are quality and environmental certified by ISO-9001:2015 and ISO-14001:2015.

FUNCTION AND DESIGN

In the Stilolinea range you will find functional pens in elaborate designs with many printing possibilities. The pens are made of high quality, glossy ABS plastic that of course is non-toxic and and free from harmful additives. All the refills are always with a one-year warranted duration. Stilolinea also offers some of the most popular eco-pens on the market, made of a special patented plastic from NatureWorks. All pens in the assortment can be assembled in custom colour combinations for orders of at least 5000pcs or alternatively specially made in your own PMS colour with moq of 10000pcs.

RENDL

NatureWorks

CONSIDER THE ENVIRONMENT WHEN CHOOSING YOUR **PROMOTIONAL PEN**

NatureWorks is a world leader in biopolymer technology. Their patented Ingeo material of renewable raw materials has unique properties that are not found in traditional plastic. The plastic is called PLA, a polyester derived plant fibers, which makes it bio-degradable and compostable at temperatures above 60°C. Most of Stilolinea's eco-pens are made of PLAplastic (except refill and spring). Besides that, only one third of the energy is used to produce a pen barrel from PLA compared to the traditional ABS plastic, equal to 66% less CO2 emission.

3 tips to consider when ordering promotional pens...

Promotional pens are a traditional and much appreciated product media. Despite the fact of being effective tools for brand building, they are often purchased routinely as consumables. Consider these factors when choosing promotional pens suitable to your needs and budget in relation to the value they will generate.

3 TIPS WHEN ORDERING PROMOTIONAL PENS

1. Choosing promotional pens -Based on the company, you should choose a pen that reflects the graphic identity. Of course, the colour is important here, but also consider the shape of the pen in combination with the logo. For example, a round logo with a lot of text is not suitable for a thin pen with a small printing area. It can also be an

advantage to make several printings on the pen to complement the logo with a special message or a web address. Remember, a promotional pen changes owner on average 3-4 times and the last recipient is probably not sitting on the same information as the person that first received it.

Tip: First decide what message you want to convey and consider different functions (such as push- or twist mechanism, touchpen or type of ink), then choose a pen in the right colour and shape for your brand.

2. Number of pens - One pen "for every personal meeting" is a good rule of thumb. If you do not know how many pens to order or find it difficult to estimate the consumption – order a smaller number of pens in the first round. What can be affected is the price per piece. The more pens – the lower the price. We think the most important thing is that it will be the right pens. You can always order more, usually your original is saved which means no extra work for you.

3. Time - Try to set aside enough time to ensure that you maximize the PenValue of your promotional pens. Lack of time more often tends to result in the conclusion of bad deals and disappointing experiences.

THE WORLD IS CHANGING. WE ARE CHANGING WITH IT.

Natural tones of the new recycled models

10 - CLOUD

21 - ABYSS

06 - ICE

Change is a choice and it depends on each of us. To change means to choose responsible, sustainable consumption that prefers quality to quantity and raw materials from recovery chains. The use of recycled materials reduces the emission of greenhouse gases and production usually requires less energy compared to manufacturing from non-renewable sources. However, a sustainable alternative does not have to mean aesthetic compromises. In Maxema's new eco range you will find well-designed pens of high quality in eight shades inspired by the colours of nature. This is where their change for more environmentally aware consumption begins.

THE PENS:

Designed and produced entirely in Italy using only high quality Italian and German raw materials.

THE PLASTIC:

Top quality, non-toxic ABS, highly resistant to knocks and sudden changes in temperature, of excellent glossiness and colour stability, free from dangerous substances such as lead, mercury, chrome and cadmium.

THE COATING:

Four layers of coating for perfect sealing and free of toxic substances.

THE INK:

Only German, non-toxic Documental ink (ISO 12757-2), conforms to European (REACH) and American (TSCA) directives. The refills in the pens are Jumbo refills which can write for up to 2500m and X-20 for up to 2000m.

MOOD DESIGN WITH A METAL TOUCH

A line of exclusive pens made of high quality plastic. The metal parts have been diamond cut for an outstanding dazzling result. Choose between solid or rubberized pen body from a whole palette of different colours. Delivered in an elegant black paper gift box.

SO MUCH MORE THAN JUST A PEN!

There are many situations where a pen is more necessary or extra valuable. As in all situations where we are expected to write or take notes. But a pen can also be so much more than just a pen. It can also be a name tag, a table top card or work as a drink ticket. Actually, it's only your imagination that will set the limit.

PIXEL NICE, AFFORDABLE AND LOTS OF COMBINATIONS

This series of classic ballpoint pens is available in several price ranges, combinations and a variety of colors. Here you can find everything from frosted, solid or rubberized coatings to details in chrome. The slightly curved clip is suitable for printing, but the pen body also has a generous print area (rubberized pen can only be printed on the clip).

7 situations where promotional pens have great value

There are situations and marketing purposes for which promotioanal pens are especially useful. To explain this, we have written a guide where we describe the value of promotional pens in 7 different situations. The purpose is to inspire and assist sales and marketing professionals to see new potential applications where promotional pens can add value to both brand and customers.

In the guide we list the following 7 situations:

1. Pen give away in face-to-face encounters

Profile products, such as promotional pens, are highly appreciated why it should be obvious to give them away in meetings with other people.

2. Pens increases sales and help seal the deal

A promotional pen does not usually seal a deal directly, but rather helps the process. It is all about ensuring that the pen finds its way to the right person, in the right place, at the right time.

3. Pens to enhance an experience

We know that a gift can enhance an experience and leave the recipient with positive feelings about your encounter.

4. Pens for brand-building

An effective and stylish promotional pen has a long service life and can actually be used daily by the one who has received it.

5. Pens to increase your conversion rate

Did you know that the motivation for conversion is dramatically increased if the call to action is first communicated by physical advertising, for example through promotional pens?

Mmaxema[®]

6. Pens to improve customer satisfaction

In order to get more satisfied customers, you should always strive for positive customer experiences and try to exceed your customer's expectations at every opportunity given.

7. Pens to strengthen relations in different segments

Your customers expect different things from you depending on what relations you have. That's why we recommend that you treat your customers differently. Even when it comes to promotional pens.

Take the opportunity to learn more about the value of promotional pens in different situations. Read our guide to better understand and have easier to plan for different applications in your own organisation.

Download the complete guide at: inglisweden.com

Communication 3^[6]0 Upgrade your visibility

TEXTURE

PATTERN

A pattern printed with or without text in one or more colours from the Pantone scale. The rotating screen print is realized before the pen assembly which allows you to customize the whole pen barrel, even under the clip. The printed pattern creates a personal impression and immediate attention.

DIGITALY

DIGITALY

Digital transfer: Digitaly is the digital printing technique that enables you to reproduce photographic images to the smallest detail. The result is a detailed image for a high-impact communication on a pen that will certainly not go unnoticed. Also with this technique, the entire pen surface can be used for your

I-LIGHT

personalization.

VELVET

realise multicolour creations.

ITALIAN WORKS OF ART SINCE 1968

Erga is an Italian manufacturer of pens with 50 years of experience in promotion. Through research and and a strong desire to constantly evolve Erga has successfully managed to take a position at the vanguard of production and automated personalization technologies. All production processes are of course in accordance with the EEC standards.

FOCUS ON PERSONALIZATION

The range includes a variety of stylish, high quality pens designed specially to make room for your customized and personalized communication.

360° COMMUNICATION

Pens are everywhere, even nice and good quality ones, but the most important thing in a pen is the way you use it to communicate. Communication techniques have changed. In a world where everything goes fast it is important to stand out and offer an experience. Our 360° Communication offers a combination of visual, tactile and textual elements that transmit your message with utmost efficacy. Images are processed 60,000 times faster than texts and if we can address another sense, like feeling, we can achieve even greater success. Choose from our printing techniques: Texture, Digitaly, I-Light and Velvet.

Raised 3D print: The I-Light technique gives your communication greater impact and emotion, having your logos and graphics reproduced with a thickness that is perceivable by touch. Moreover, it enhances the high brilliance of UV colours by alternating lights and shades.

Velvet print: With this technique, you can create velvety logos or other designs in one bright colour. The soft touch gives you a truly unique promotional pen that is both visible and tactile. Velvet can also be combined with other 360° techniques to

E-VENTI A PEN YOU JUST HAVE TO EXPERIENCE!

ULTRA POPULAR WITH ERGONOMIC GRIP

Popular series of promotional pens with slim, frosted body and an ergonomic rubber grip that provides a comfortable writing experience. The pen body is best suited for printing, but the small oval clip can also be printed with smaller messages and symbols.

All price examples above refer to approximate prices at the specified quantity, printing included. VAT and Freight costs excluded. For multicolour printing, add € 0,20/colour. Set up cost is € 57 for each print/colour. Set up cost for digital print is € 95.

3 tips to gain maximum effect of your communication

Promotional pens are one of the most top performing marketing channels when it comes to attention and recognition, but there are still ways to boost the communication for maximum effect. Although the advertising space on pens is quite small, it is rarely used entirely. Many companies choose to simply print their brand and web address, which of course is important from a brand-building perspective, but why not take the opportunity to communicate something more when you have the chance? A pen is like any ad why you should take advantage of its full potential. Call to action or ask a question to get more interesting. Surely you have something to say that can attract more attention.

Choose a printing technique that appeals to many senses!

The more senses you are able to attract with your communication the better. With 360° communication it becomes possible to communicate with more than just texts and symbols. With this technique you can add both visual and tactile elements and allows you to customize the whole pen barrel. By choosing this type of printing technique, you can enhance your messages in a very attractive and effective way.

1. Start with your message. What does your logo look like? Does it have any graphic elements that can be picked up in a 360 design? Maybe there is a picture or a particular pattern associated with your business? Think about what you want to convey both in text and in the form of feeling.

2. Select the pen. The pen models available for 360 communication are marked in this chapter with a 360 symbol. Choose the one that best suits your

MAKE SURE TO BE UNIQUE

message. If the logo is large, you may choose a pen with larger clip. If you want a more luxurios feeling, you may choose a pen with details in chrome. Use standard colours or make your own combinations of colours and details.

3. Wich 360 techniques do you want to use? Base the decision on the message and the feeling you want to convey. Is a visual result enough or do you want a 3D effect so that the print also gives a tactile experience?

4. Send us your logo in high resolution and in vector, together with your possible toughts and ideas, and we will shortly get back to you with quotation and a couple of diffrent print sketches.

Pilot is one of the world's oldest and leading manufacturers of writing instruments, well-known for developing innovative pen solutions for different purposes. Through investments in research and an expertise in chemical engineering, Pilot has developed several ink technologies revolutionary for the market. One of them being the thermosensitive ink included in the popular FriXion range. To secure the production and minimize the environmental impact, Pilot's factories are ISO 14001 certified.

A 100 YEAR OLD STORY!

The first Pilot pens were launched in Japan in 1918 by Ryosuke Namiki, marine engineer and professor at the Tokyo Merchant Marine College. The success was soon a fact and within the course of 8 years, foreign offices were opened in London, New York, Shanghai and Singapore. Today, Pilot pens are available worldwide and the company can proudly celebrate over 100 years of pen production.

Headson -

ACROBALL

Stylish promotional pen with large printing area and comfortable rubber grip. The ink has the same colour as the rubber grip and is extremely soft which makes the writing more smooth compared to regular ballpoint pens. Included in the Pilot BeGreen assortment which means that it is made of recycled plastic for reduced impact on the environment (not Acroball Metallic).

Ekotapeter se

SPECIFICATIONS:

Length: 143mm Net weight: 10g

Refill Acroball: 1,0mm Standard Plastic Type BP ISO 12757-2

Refill Acroball darkblue: 1,0mm Standard Plastic ISO 11798

All price examples above refer to approximate prices at the specified quantity, printing included. VAT and Freight costs excluded. For multicolour printing, add € 0,33/colour. Set up cost is € 57 for each print/colour. Set up cost for digital print is € 95.

CHOOSE RECYCLED AND IMPROVE THE ENVIRONMENT:

Pilot's ISO 14001-certified factory in Japan is where all pens in the BeGreen range are produced. Within BeGreen all pens are made of recycled plastic compliant to ISO 14021 requirements. Today about 20% of Pilot's total sales are recycled pens. You can help improve that figure by choosing recycled too.

SUPER GRIP OFFICE CLASSIC SUITABLE FOR PROMOTIONAL PRINTS

This classic office pen is becoming increasingly popular to use as a promotional item. With it's oil-based documental-safe ink, comfortable grip and click mechanism, the ballpoint pen has become a favorite of many. In black version, Super Grip is also available as pencil. Printing on the clip is to be preferred.

For multicolour printing, add € 0,33/colour. Set up cost is € 57 for each print/colour. Set up cost for digital print is € 95.

SUPER GRIP G 10182-0022

Modern version of the classic office pen with slightly cleaner lines and softer shapes. The pen has a push button, patterned grip and is available in several clear transparent colors where the ink follows the pen barrels colour.

FRIXION CLICKER THE BALLPOINT PEN WITH ERASABLE INK!

This world-famous ballpoint pen has become incredibly popular thanks to it's clickable clip and erasable ink in the same colour as the pen body (white pen has blue ink). The ink can be erased as many times as you like. After two years the written text becomes permanent. The technology is based on friction and the eraser itself is indestructible.

All price examples above refer to approximate prices at the specified quantity, printing included. VAT and Freight costs excluded. For multicolour printing, add \in 0,33/colour. Set up cost is \in 57 for each print/colour. Set up cost for digital print is \in 95.

PILOT

REX GRIP ECO-FRIENDLY WITH DOCUMENTAL SAFE INK

SWEDISH MANUFACTURER

Ballograf is the only Swedish manufacturer of pens. Production started in 1945 in a garage in Gothenburg and today they produce over 4 million ballpoint pens and pencils every year, mainly to the office supplies market.

SUSTAINABILITY AND WARRANTY

With its carefully selected materials Ballograf guarantee high quality and sustainability of their products. The original refill contains a documental safe ink, certified by Swedish Archive with a writing length of at least 8000 m, which is 4 times longer than an average refill. In addition all models have a lifetime warranty on the push mechanism.

AWARD WINNING DESIGN

Ballograf's true classic Epoca has an award winning, elaborate design and has been produced since the early 60's. Over the years Epoca P and Epoca Deskset have become immensely popular all over the world. Today they are almost as much appreciated as fashion accessories as enjoyable pens. Worth mentioning is also that Epoca P is manufactured by cellidor, an extra durable plastic that makes it less susceptible to break.

EPOCA MADE IN SWEDEN CLASSIC

This series of classic ballpoint pens have been manufactured from the early 1960s, but are still very popular due to their elegant, timeless design and high quality. In recent years, the series has been supplemented with several versions and a variety of fine retro colours so you can easily find your favorite. The refill contains documental safe ink approved by Swedish Archive and writes a total of 8000m. In addition, lifetime warranty is provided on the push mechanism.

BALLOGRAF

EPOCA DESKSET 10183-0128

Launched as a bank pen in 1961, it's still manufactured in Sweden and the assembly is made in seven different steps all performed by hand. In recent years, this classic deskpen has gone from being a typical post- and bank office item to be a true fashion accessory. Today you can buy an Epoca Deskset at MoMA in New York.

BALLOGRAF.

Pencils

In this chapter we present our mechanical pencils. Here we offer affordable quality models suitable for schools and hotels as well as for the conference and the office - all in a price range below \leq 1,00/pc.

Our pencils come from different parts of the world, all produced by reliable manufacturers and under strictly supervised production. Most models are kept in stock in a wide range of colours to enable fast deliveries. Some models can also be ordered in your own PMS colour at moq 5.000-10000pcs.

CONSULT POPULAR PENCIL

Popular pencil ideal for conferences, hotels, schools, etc. Consult has a thin, slightly curved pen body and rubber grip which makes it pleasant to write with. Under the cap there is a white eraser.

CONGRESS 20081-0002 CLASSIC PENCIL

Classic pencil with a solid, straight pen body which provides a large printing area. Delivered with 3pcs of 0.7mm leads. White eraser on the push button.

Pencils - page 78

Pencils

Pencils - page 79

TIMMERMAN 20094-0001

Steady pencil which is perfect for craftsmen, do-it-yourself enthusiasts or why not crossword solvers. The pen has a thicker and more sustainable lead for smooth writing on different surfaces and a big eraser on the top. Now also available with yellow pen body to appear even better in your toolbox.

Special production: Customized pens at reasonable prices

We know that promotional pens are an affordable and efficient media for advertising, but how well they serve their purpose depends on how we make them communicate. Just like in all marketing, it's all about visibility and sharing an experience. But how is that possible since there are so many promotional pens out there? It's a cliché, but true, that you must be unique and stand out from the crowd if you want to reach out with your message. The standard selection of pens on the market is extensive so you will not have any trouble finding one in the right colour and shape that suits your brand. However, this means that many other companies will be sharing the same pen as you.

Thanks to custom production, we are able to develop pens in all shapes and colours and with a multitude of functions. There are actually no limits to what you can do – if you're yearning for a carrot-shaped pen in a particular shade of orange, we can help.

Pens in your own PMS-colour

But custom production needn't be quite so advanced. If you can plan ahead of time, this is also a very costeffective option for large-volume orders. Thanks to delivery straight from the factory, we can offer lower prices on more or less all the pens in our standard range. Most of our standard pens can also be customised with your own PMS colour.

Minimum quantities:

The minimum quantities for custom-colour plastic pens vary from 5,000 to 10,000 pieces depending on the model. The minimum quantity for metal pens is 5,000 pieces. Custom combinations of standard colours are usually available at even lower volumes.

Pencils - page 80

Pencils

Customised packaging

In addition, we can produce customised packaging for your pens. A nice and simple option is our Paper Case, which is available in a custom design when ordering just 500 pieces. Other packaging includes custom cases, boxes, shop display units, blister packs, and other displays. Pen accessories such as note books, folders, and the like can also be produced.

More about Special production on inglisweden.com

Premium

For the pens in our Premium range, quality and feeling are the most important values. This chapter includes our most popular and exclusive metal pens along with luxurious pens from well known brands. Several models can preferably be delivered as a set to include different types of pens, such as ballpoint pens, fountain- and rollerball pens. This, as the pen type and refill often play an important role when it comes to writing comfort.

The most luxurious pens are by standard delivered in gift boxes. Otherwise, all metal pens printed or engraved by us will be delivered free of charge in stylish Paper Cases, but other cases and gift boxes are also available.

HEMINGWAY 20101-0018

PRINTING & ENGRAVING

ENGRAVING (Yag)

ENGRAVING (Co2-laser)

TEMPLATES & LOGO PLACEMENT

ARTWORK

Before the production starts we always send a digital artwork for approval. The artwork contains the size of the print, the placement and the colours of the print. It is also of great importance that you read the artwork carefully and make sure that all information is correct. Please note that a delayed approval of the artwork may involve an extended delivery time. If we have to make changes to the artwork, a new one is always sent for approval.

TEMPLATES

All our pens has their own template. Please observe that the print sizes which are presented in each template are only approximate since the printing possibilities always vary depending on the looks of the print.

Please observe that not all templates in this catalogue are in 100% and that all print measues are in millimeters.

Below you can see our print placements:

PMS-colors that are in different % will turn into halftones.

SCREEN PRINT

DIGITAL PRINT

ORIGINAL

department

TAMPO PRINT

SCREEN PRINT

FOIL PRINT

feeling.

DIGITAL PRINT

FNGRAVING

and uneven surfaces.

Are received digitally in EPS-/AI- or PDF-format created in programs like Adobe Illustrator or Corel Draw. For best result, logos and pictures should be in vector as well as all the text, otherwise the desired font has to be attached together with the order. If you don't have the logo in vector, our Artwork department can help you with creating a new original file (for price see price list). We also make text compositions if desired (for price see price list). Note that a vector original can not be created in programs like Word, Photoshop or Powerpoint. If you have questions regarding an original or logotype, please contact our Artwork department by e-mail or telephone.

Tampo printing is one of the most common of our print methods and is best

suited for detailed imprints and logos. It it also best on convex, concave

Screen printing is best suited for larger imprints with less details, and for larger editions. With screen printing, it is possible to print all around the pen.

What makes foilprint different from the other print methods is that the foilfilm is really shiny, like chrome or gold. The imprint has a uniform

colour coverage and a smooth, glossy surface that creates a luxurious

Digital printing makes it possible to print photos in multiple colours and

Laser engraving provides a permanent marking, is environmentally friendly and is made with both high speed and accuracy. We use both Yag- and CO2 lasers, which are two different machines and "techniques". One is suitable for marking bare metal, the other is suitable for painted surfaces.

If you have questions regarding print methods, please contact our Artwork

bleed printing on both small and large areas.

Important considerations regarding the original file:

- The original file is saved in vector and as an EPS-/AI- or PDF-format.
- That a vector original can not be created in programs like Word, Photoshop or Powerpoint.
- If you want your text to be in a specific font, please attach it together with your order.
- That all texts in the original file are saved as vectors (that also applies to pdf-originals).

PRINTING

PMS, Pantone Matching System, Solid Coated is the color system that we use and we can make printings up to 4 colors. The PMS system is based on prints made on white surfaces and therefore we may have to make a white background print on black or dark products to guarantee the right color. Please observe that all PMS-colors that are not in 100 % will turn into halftones. We are also able to make half-toned prints in 4 colors, and 1 color prints in metalized foil.

Important considerations regarding prints:

- Giving the correct PMS-colors when you place an order, even if the logo is made in PMS-colors.
- That background prints could be necessary on black or dark products.
- PMS-colors that are not in 100 % will turn into halftones (see sketch to the left)

ADDITIONAL INFORMATION

Price and delivery information:

Prices are in EUR per piece without VAT, FCA Stockholm, Sweden. Deliveries made by our courier will be charged. In case of hindered delivery there will be an additional cost. Therefore, be sure to inform us about for example change in opening hours. We reserve the right for errors in the article and price information and the right to change prices without any notice due to substantial changes in currency exchange rates etc. Though we always try to deliver exactly the number of pens/products you have ordered we want you to know that over- or under deliveries sometimes may occur. Another thing that is important to remember is that there can be colour differences if you compare the products to the images in the catalogue, artwork or website. If the colour of the pens/products are particularly important to you, we recommend that when placing your order that you also ask for a sample of the product, just to avoid any surprises in connection with your delivery.

Artwork 3 or more....

How to handle consumer complaints:

If you are not pleased with our services we would very much like to know it. This is how you make a complaint about a product or service. Your written notification should be sent to us by letter or e-mail within 14 days after delivery. If your errand concerns the printing or engraving it should be reported immediately in order to make corrections as soon as possible. The most efficient way to handle a claim is to contact the person you received the order confirmation from. Please enclose your documentation of this mission, for example invoice or order confirmation. All complaints will be handled according to the rules of the Swedish Board for Consumer Complaints (ARN).

Our work for sustainability!

Ingli Sweden is striving for sustainable business. The key areas of sustainability is environment, employment, human rights, anti-corruption and responsible leadership. Our corporate responsibility is in especially three areas: economic, social and environmental. We have chosen a strategy that is based on the fact that we are part of the problem, which means we can also become part of the solution towards sustainable development. We are constantly working to integrate sustainability in our operations as well as in the products and services we offer.

Code of Conduct

We support the guidelines of United Nations' Global Compact and accept our responsibility regarding human rights of those affected by our activities as well as our responsibility to contribute to sustainable development in society. We have established a social code of conduct that applies to our own operation and in the relationship with suppliers of products and services. The code is a natural part of our work

SUSTAINABILITY FOR (URRENT AND FUTURE GENERATIONS!

and describes among others the legal requirements and demands of working conditions, working and living environment. Contact us if you want to take part of our documentaton.

We think it is important that our operation leave as little impact on the environment as possible. This is achieved by making environmental demands to our suppliers and being aware of our own deficiencies. Our main activities right now are to:

- Most of our new products are eco-friendly and we try to guide our customers in making sustainable choices
- We optimize our transports to reduce the environmental impact, eg. we cotransport goods from Asia by boat. It is important to realize that shipping is an essential part in purchasing sustainable products.
- We economise our resources and have the highest possible level of recycling.
- We use 100% renewable energy.

Of course we also comply with applicable environmental laws and constantly work to reduce our impact on the environment.

Ingli Sweden wants to extend its responsibility beyond that required by law. This is why we have chosen to become certified within the framework of ISO quality and environmental management standards in accordance with ISO 9001:2015 and ISO 14001:2015. Our quality- and environmental management system helps us meet the challenges we face and take advantage of the opportunities with which we are presented. We want to contribute to the long-term, sustainable development of our planet and the people that live here, both current and future generations. The work we have started together is something we take great pride in. It is a task that will never end, but the fact that we are working together towards achieving a more sustainable future is a source of joy and commitment.

Our overall, long-term quality goal is to continually act to reduce quality deficiencies and raise the quality of our products and services while our environmental goal is to increase the proportion of products made from materials with less environmental impact.

Our range of Eco pens

The environment is one of our most important sustainability issues. We offer a wide range of eco pens made from materials that are better for the environment from a sustainability perspective.

It should be easy to make the right choice

Our ambition is to provide and constantly expand our eco range of promotional pens. It is our responsibility to inform about which pens are better for the environment and try to steer our customers and partners towards more eco-friendly alternatives. It should be easy to make the right choice.

Materials with less environmental impact

In our range, we have a variety of pens made of materials with less environmental impact compared to traditional, new produced plastic. For example, we offer promotional pens made of:

– Ingeo® PLA, biodegradable

Our pens in PLA are made of a patented and environmentally certified material from NatureWorks called Ingeo[®]. Ingeo[®] PLA is extracted from renewable raw materials, such as plant fibres and lactic acid, and has unique properties that are not found in traditional plastics. The material is biodegradable and compostable at temperatures above 60°C so that it can re-enter the natural cycle. Also, the production of PLA requires only one-third of the energy needed for the manufacture of ordinary ABS plastic.

– Recycled ABS

ABS is a sustainable and durable plastic with a nice lustre that works great to recycle. The advantages of plastic recycling are many. Pens of recycled ABS are a good environmental choice as it contributes, among other things, to reduced new production of plastic and the utilization of non-renewable raw materials.

BE SURE TO MAKE THE RIGHT (HOI(E!

- rPET, recycled PET-plastic

Promotional pens made from recycled rPET plastic are constantly increasing on the market. It is a light and strong plastic that is very durable. rPET is made of 100% recycled PET bottles and can be reused for new products many times. rPET plastic is not environmentally friendly in itself, but it does have less impact. As with all plastic recycling, manufacturing in rPET also contributes, for example, to reduced waste disposal and reduced oil dependency.

- Recycled paper

Recycled paper is, from an environmental point of view, generally a better material than plastic. Among other things, plastic production releases considerably more greenhouse gases than the corresponding paper production. Also, production with recycled paper swallows considerably less energy. To recycle paper and use for manufacturing other products also contribute to resource-efficient production and reduced waste, which is necessary for our circular economy.

Quality, creativity and 40 years of experience in printing pens.

For 40 years, Ingli Sweden has provided the market with printed promotional pens. It was in 1980 that the founder Jaan Ingel got the idea to start a small printing business for advertising products together with his family in his own basement in Täby, north of Stockholm. His vision was clear. To make long lasting relations and create value by offering his customers creativity, knowledge, service and quality. A strong vision that lives on in the company even until this day.

Today Ingli Sweden is the largest dedicated pen supplier on the Swedish promotional product market. With a large stock of pens in different varieties and our own printing house, we can offer a great deal of options and short delivery times. Ingli Sweden also have the agencies for some of the largest pen manufacturers in the world and have several wellknown brands such as INGLI, Stilolinea, Maxema, Cross, Parker, Erga, Bic. Pilot and Ballograf in our assortment. Pens are our passion and our main goal is to make all people aware of the value you get by giving pens.
