

CONSIDER THE ENVIRONMENT WHEN CHOOSING YOUR PROMOTIONAL PEN

NatureWorks is a world leader in bio-polymer technology. Their patented Ingeo material of renewable raw materials has unique properties that are not found in traditional plastic. The plastic is called PLA, a polyester derived plant fibers, which makes it bio-degradable and compostable at temperatures above 60°C. Most of Stilolinea's eco-pens are made of PLA-plastic (except refill and spring). Besides that, only one third of the energy is used to produce a pen barrel from PLA compared to the traditional ABS plastic, equal to 66% less CO2 emission.
